

8th European Panel Products Symposium

13, 14, 15 October 2004

Table of Contents

Keynote Address:

Improvements in OSB as a Commodity and Specialty Product:	KA-1
<i>M Angelini</i>	

Session 1: Recycling Issues and Practices

Wood Recycling and the Panel Board Industry - Overview of Issues, Good Practice and Support Activities:	1-1
<i>T Fourcade</i>	
Biomass - Implications for the Forest Products Industry:	1-2
<i>P Billins</i>	
Wood Panel Recycling at a Semi-Industrial Scale:	1-7
<i>V Kearley and G Goroyias</i>	
An Investigation of the Metal Contaminants in Particleboards made from Recycled Wood:	1-19
<i>M Irle, C Fru, K Maher and G Sawyer</i>	

Session 2: Formaldehyde Issues and More

Formaldehyde – The Big Issue:	2-1
<i>J Sharpe</i>	
Gas Analysis, a Reliable Method for Formaldehyde Emission:	2-26
<i>L Ballarin</i>	
Japanese Influence on the Global Panel Market:	2-34
<i>T Martin</i>	
IAQ and Emissions from Wood-based Panel Products:	2-38
<i>C Yu and D Crump</i>	
Regulatory Trends and MDI Resins:	2-52
<i>J Dobbs and S Baker</i>	

Guest Speaker:

A View from the Outside: Ten Years of Reporting on the Worldwide Panel Industry: <i>M Botting</i>	GS-1
--	------

Session 3: Fundamentals

Blowline Blending - the Next Stage: <i>K Chapman</i>	3-1
Thermokinetic Simulation of a Hot Press Cycle in the Production of Particleboard and MDF: <i>C Heinemann, R Mitter and M Dunky</i>	3-11
Modeling Cure of a Phenol-Formaldehyde Adhesive: <i>F Kamke, B Scott, C Frazier and M Sernek</i>	3-23
Monitoring of Temperature and Gas Pressure to Characterise and Optimise Process Parameters in the Production of Laminated Veneer Lumber: <i>C Stone, S Kirincic, B Mallas and K Haselhofer</i>	3-35
Predictive Modelling of the Internal Bond of MDF using Genetic Algorithms with Distributed Data Fusion: <i>TM Young, N Andre and CW Huber</i>	3-45
Some Mechanical Properties of Particleboards Produced with Phenol Formaldehyde added Hazelnut-Shell Lignin: <i>H Kalaycioglu, A Donmez, H Kirci and E Pesman</i>	3-60
Characterisation of Panel Surfaces through Contact Angle and Surface Energy Measurements using PGX Goniometer: <i>R Elias and A Hutson</i>	3-64
Visualisation of Interfacial Behaviours of Natural Fibre-Plastic Composites: <i>W Grigsby, A Thumm and M Gaugler</i>	3-68
A New Bio-Resin System for Panel Products: <i>P Fowler, V Tverezovskiy, C Chappell, C Fitchett, N Laughton and J Seefeld</i> .	3-80

Session 4: Process Control and Equipment

Moisture Detection – the Next Generation: <i>J Döscher</i>	4-1
How can your Production Benefit from Image Processing Techniques?: <i>K Greten</i>	4-8
Measurement of OSB Strand Size and Orientation – Image Processing Methods, Implementation, and Experiences with Production Monitoring: <i>B Plinke</i>	4-13
Systematic Reduction of Operating Costs in the Derived Timber Product Industry: <i>A Lingen, G Bernardy and T Sandweg</i>	4-24
Powder Coating of MDF in the Furniture Industry: <i>L Karlsson</i>	4-36
Wood Based Panels - Material Parameters and Specifications: <i>M Fan and P Bonfield</i>	4-48

Technical Presentation Forum

Comparison of Slack and Emulsion Wax Distribution in Commercial MDF Panels: <i>Warren J. Grigsby and Armin Thumm</i>	T-1
On the pH Values of Veneers and Plywood treated with some Boron Compounds: <i>S Çolak and G Çolakoğlu</i>	T-3
Behaviour of Particles Compressed in the Radial and Tangential Direction during Hot-Pressing: <i>E Ncube, M Irle and H Mansfield-Williams</i>	T-8
Development, Manufacture and Characterisation of Cement-Bonded Panels of Maritime Pine, Blue Gum and Cork: <i>C Pereira, FC Jorge, M Irle, JMF Ferreira, AS Neves and JS Coutinho</i>	T-20
Modelling and simulating the bond strength development in a wood furnish mat during hot pressing: <i>H Thoemen and C Heinemann</i>	T-34
