

Table of Contents

Session 1: The Built Environment

- Investigation of thermal conductivity and moisture behaviour of fibreboard and material combinations
Volker Brombacher, Franco Michel, Thomas Volkmer and Peter Niemz 3
- Measuring VOC emissions from wood-based building products under real room conditions in an idealised model room
Eva Höllbacher, Cornelia Rieder-Gradinger, Daniel Stratev and Ewald Srebotnik 17
- Thermal characteristics of panels from cellulose fibres
Sergej Medved, Boštjan Lesar and Miha Humar 29

Session 2: Formaldehyde Testing

- Testing parameters affecting the gas analysis value of particleboard
Martin Ohlmeyer, Johannes Kickhöfen, Vera Steckel and Jörg Hasener 41
- Developing a new method of measuring formaldehyde emissions from wood-based panels
C. Lenth, A. Schumann, J. Hasener, V. Steckel, S. Himmel and C. Mai 49

Session 3: Enhancing Performance by Additives and Processing

- KEYNOTE: Hierarchical shift for wood panels from biocomposite to biomaterial
Roger M. Rowell, John Alexander and Michael Maes 61
- A study of the mobility of formaldehyde during hot-pressing of particleboard mattresses
Mark Irle and Christophe Belloncle 75
- Reducing Formaldehyde Emissions: A new approach by using additives as an alternative to employing non-formaldehyde binders such as pMDI
K.D. Godber, P. Würtz and J. Würtz 83
- Formaldehyde emission in wood-based panels: effect of curing reactions
N.A. Costa, J. Pereira, J. Ferra, P. Cruz, J. Martins, F.D. Magalhães, A. Mendes and L.H. Carvalho 91
- An amino-alkyl siloxane oligomer as water repellent for particleboards used under high humidity conditions
Murat Onat, Lars Kloeser and Carsten Mai 101

Session 4: Raw Materials

- KEYNOTE: Prefabricated biocomposite panels: delivering lower carbon construction and healthier buildings
Pete Walker 113
- Increasing the use of English grown wood – a policy perspective
G. Newman, E. Macdonald, D. Robson, G. Hilton and S. Molteno 115

European hardwoods for reducing the dependence on pine for oriented strand boards <i>Ali Akrami, Marius C. Barbu and Arno Frühwald</i>	127
---	-----

Session 5: Life Cycle Assessment and Certification

Getting the best out of timber – timber products, industrial ecology and carbon sequestration <i>Callum Hill and Andrew Norton</i>	135
Carbon sequestered in UK forest products and wood-based panels in construction: helping to meet the UK's greenhouse gas emission reduction targets <i>David Robson, Piers Sadler and Gary Newman</i>	143
Gate to gate life cycle inventory of OSB products <i>Desmond Dolan and Annette Harte</i>	155
Development of a phenol-formaldehyde resin with low formaldehyde emissions that respects LEED certification <i>N. Paiva, J. Pereira, J.M. Ferra, J. Martins, L. Carvalho and F.D. Magalhães</i> ...	167

Session 6: Recycling

The influence of the presence of recovered wood on the formaldehyde release of particleboards <i>S. Himmel, M. Irle, G. Legrand, R. Perez and C. Mai</i>	179
Cleaning Tower – a new concept for complete wood chip cleaning <i>Michele Libralato</i>	189
The “Flashing Sky Technology” for the low-cost and high-volume optical sorting of waste wood debris and panels <i>Robert Massen and Thomas Franz</i>	199
An opportunity for hardboard recycling <i>Elena Tikhonova, Mark Irle and Michael Lecourt</i>	207

Poster Session

MDI bonded heartwood composites – some indications of the impact of MDI on formaldehyde and VOC emissions <i>D. Prateli, S. Holvoet, C. Phanopoulos, R. Carleer and P. Adriaensens</i>	217
VOC emissions from building materials – first results from LAB and full scale trials <i>C. Fürhapper, S. Niedermayer, E. Habla, M. Nohava, A. Nagl, S. Polleres and M. Weigl</i>	219
Effects on panel properties following incorporation of reject paper fibre into MDF <i>S. Curling, B. Stefanowski, N. Laflin, G. Davies and G. Ormondroyd</i>	225
Energy use and carbon emission in the plywood manufacturing process <i>Olli Paaajanen and Lauri Linkosalmi</i>	231
Multivesiculated particles as lightfillers for wood-based panels <i>Â. Dias, I. Gonçalves, J.M. Ferra, J. Martins, L. Carvalho and F.D. Magalhães</i> .	237
