

# Table of Contents

## Session 1: VOCs and Emissions Scavenging

KEYNOTE: Evaluation of VOC from building products at a European level – chances and challenges for wood and wood-based products <i>Martin Ohlmeyer</i> .....	3
Reducing exposure to VOCs in the indoor environment, what are the drivers and what could this mean for the wood based panel industry <i>Simon Corbey and Ceri Loxton</i> .....	5
Bark as a formaldehyde scavenger <i>Sergej Medved, Alan Antonovic and Marius Barbu</i> .....	19

## Session 2: Plywood and Laminates

Analysis of the cold tack of urea formaldehyde as an important factor in birch plywood production <i>E. Hogger, H.W.G. van Herwijnen, J. Moser, W. Kantner and J. Konnerth</i> .....	29
A case for THM treatments of Southern Patagonian wood species, <i>Nothofagus pumilio</i> and <i>N. antarctica</i> , in three layer laminates <i>M. Schwarzkopf, M. Burnard, G. Martinez Pastur, L. Monelos and A. Kutnar</i> ...	33
Developments within the COST Action FP1303 related to bio-based composite materials <i>Dennis Jones and Christian Brischke</i> .....	43

## Session 3: Recycling

Increasing the profitability of wood recycling by selective processing <i>M. Irle, F. Privat, G. Deroubaix and C. Belloncle</i> .....	55
Recycled fibres from waste fibreboards as a partial substitute of virgin fibres in MDF <i>E. Roffael, C. Behn and T. Schneider</i> .....	63
Designing, building and running an MDF recycling process – an update on MDF Recovery Ltd <i>Craig Bartlett</i> .....	77

## Session 4: Bioresins

Effect of magnesium lignosulfonates on urea-formaldehyde resins <i>A.M. Ferreira, J. Pereira, M. Almeida, J. Ferra, N. Paiva, J. Martins, L.H. Carvalho and F.D. Magalhães</i> .....	81
Advancements in sustainable binder technology for composite wood applications <i>Gavin Hatherell and Emmanouil Karagiannidis</i> .....	89

How does molecular weight of kraft lignin influence the bonding strength of lignin-based phenol formaldehyde resins? <i>P. Solt, P. Lingenfelter, J. Konnerth and H.W.G. van Herwijnen</i> .....	91
---	----

## Session 5: Innovations in boards

Wood Foam – a new wood product <i>Frauke Bunzel</i> .....	99
Moisture migration in bio-based insulation materials <i>Sergej Medved and Mark Irle</i> .....	107
Sprayable hot melt hydrophobes as treatments to enhance the moisture-resistance of oriented strand board <i>Barend Lötter and Philip Evans</i> .....	115

## Session 6: Resins

Alternative formaldehyde-free urea resins for wood-based materials and décor papers <i>Kathrin Jesse and Frauke Bunzel</i> .....	129
Development of UF resins with high storage stability by addition of reaction blockers <i>P. Pereira, J. Pereira, N.T. Paiva, J.M. Ferra, J. Martins, L.H. Carvalho and F.D. Magalhães</i> .....	135
2GAR project – Development of second generation amino resins <i>A. Antunes, N. Paiva, J. Ferra, P. Pereira, A. Ferreira, F. Magalhães, A. Gomes, J. Pereira, C. Coelho, J. Martins and L. Carvalho</i> .....	145

## Poster Session

Effect of blowing agent on the physical and mechanical properties of foam core particleboards <i>Ali Shalbafan, Kamran Choupani Chaydarreh and Johannes Welling</i> .....	153
Bio-based fibreboards: structure and properties <i>Bianca-Ioana Dogaru, Carmen-Mihaela Popescu and Dennis Jones</i> .....	159
Development of lightweight hybrid wood-based panels using in-situ foaming of polystyrene granules <i>Ali Shalbafan, Saber Jafarnejhad and Jan Luedtke</i> .....	161
Changes in mechanical properties for re-dried WPC with thermally modified wood particles after water absorption test <i>E. Kuka, D. Cirule, J. Kajaks, I. Andersone and B. Andersons</i> .....	167
Wood plastic composites made with birch false heartwood residues <i>H. Kallakas, M. Martin, T. Poltimäe, A. Krumme and J. Kers</i> .....	169
A study of miscanthus straw for composites: microscopy and fibre analysis <i>W. Turner, P. Robson, M. Bosch and M. Spear</i> .....	171

- Selected properties of a new particleboard modified with carbon nanotubes.  
*W.Ł. Grzeńkowiak, D. Łukawski, D. Dukarska, B. Mazela and A. Dudkowiak ...* 175
- Adding value to UK grown timber by CLT production: a KTP project  
*A. Dimitriou, P. Ellis, M.J. Spear, S.F. Curling, R. Jones and G.A. Ormondroyd.* 177
- An industry-prioritised survey of thermal, mechanical, hydro and decay properties of natural fibre insulation materials  
*G.A. Ormondroyd, B.K. Stefanowski, E. Mansour, M.J. Spear and S.F. Curling.* 179
